

NP Screen Web Portal is an information technology service provider which allows for the transmission of health information including personal health information between health service providers (“custodians”). Users of the Portal are restricted to physicians conducting cancer screening tests on their patients utilizing the NP Screen tool and laboratories analyzing the test results. Physicians and laboratories will communicate with each other with respect to the patients and test results through the Portal.

We have implemented the following safeguards to ensure that information transmitted through the Portal is not disclosed to persons other than the intended recipients

Such measures include using password encryption, data encryption, a firewall to prevent unauthorized access, a Secure Sockets Layer (“SSL”) protocol with support up to 1024-bit encryption and automatic log-off after fifteen (15) minutes of inactivity.

We have implemented the following directives, guidelines and policies in connection with the services provided by us through use of the Portal

Personal information is not disclosed to any person or organization or required by law. NP Screen Web Portal does not sell, rent, or lease personal information.
